Capabilities Statement

Cascade Air Traffic Management Services LLC has a highly experienced recently retired professional Air Traffic Controller within the National Airspace System (NAS). We are able to leverage over 35 years of ATC experience at the Indianapolis Air Route Traffic Control Center (ARTCC). Our knowledge base includes En-Route Air Traffic experience in the Domestic environment, extensive experience with airspace, procedure, and program development, testing, and implementation.

Cascade Air Traffic Management Services LLC has worked at a high level within the National Airspace System (NAS). Our company's experience includes 36 years as FPL/CPC at the Indianapolis Air Route Traffic Control Center as an Air Traffic Control Specialist. Our company's leader's work history includes En-Route Air Traffic experience in the domestic environment, with expertise on ERAM, ADSB, and CPDLC. We have also worked on local and national teams/workgroups for both the FAA and NATCA including being a team lead, sight test lead, and operational evaluation test SME..

Core Competencies

- Practical Enroute Air Traffic Control Experience
- Knowledge of the National Airspace System
- Airspace and Procedure Development
- System Engineering
- Collaboration

Differentiators

In addition to having extensive high-level air traffic control experience, we have served as the Primary Facility Representative for one of the largest NAS facilities, as well as a national ERAM SME. That practical experience, combined with leadership, communication, and collaboration skills developed through those various roles offer a unique and powerful combination difficult to duplicate.
